Marc Urselli GRAMMY® Award-Winning Engineer Loves IK Software

CSR and AmpliTube 2 used at Eastside Sound in New York City

Marc often uses IK Multimedia software on records he produces or engineers at Eastside Sound Studios in New York City, where 99 percent of all his work is done. His impressive list of credits includes Les Paul, Sting, Joss Stone, Eric Clapton, Jeff Beck, Keith Richards, Joe Perry, Vincenzo Pastano, Luther Vandross, Adrienne Arno, Courtney Bradley, Jeremiah, and many many others.

Marc mentions that **CSR** is "one of my go to reverbs in the digital domain because it has a great tone, richness and full body." Marc goes on to say, "Portability and the ability to reopen a session...is really a key factor in the choice of a digital plug-in reverb." You can find CSR in both rooms at Eastside Sound because Marc says that not only does he love it but "the whole staff loves it!"

In addition to CSR, Marc also uses **AmpliTube 2** for both guitar and vocal tracks. "AmpliTube 2 is a really great sounding plug-in which I really love," gushes Marc. He goes on to mention that "AmpliTube 2 has been one of my distortion plug-ins of choice for a long, long time." Marc again reiterates, "The ability to re-open a session and tweak a sound is priceless."

Be sure to check out Marc's video testimonial- both in Italian and English.
